Sustainable comfort for every home

Daikin air-to-air heat pumps deliver heating, cooling, and clean air in a single, intelligent, energy-efficient system. By taking up to 80% of their energy from the air and just 20% from electricity, these eco-friendly systems provide affordable comfort all year round.

Smart, efficient operation

With advanced inverter technology, Daikin systems automatically adjust their output to meet the room's needs. This efficient operation reduces unnecessary energy use by up to 30%. With seasonal efficiencies as high as A+++, you can save energy and lower your bills without compromising on comfort.

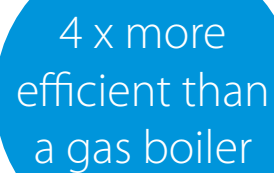

Quiet and adaptable

With indoor sound levels as low as 19dB(A), Daikin heat pumps are quieter than a whisper, and perfect for bedrooms, offices, and living spaces. What's more, our systems can be flexibly designed to work for one room, several rooms, or a whole home.

In control, wherever you are

Take control of your climate your way. The Onecta app lets you adjust settings, schedule operation, and monitor energy use from your smartphone, at home or away. You can also use voice commands through Alexa or Google Assistant, or a traditional remote control if you prefer.

With sustainable technology, sleek design, and silent operation, Daikin lets you enjoy comfort all year round, together with low costs and best-in-class efficiencies.

4 x more
efficient than
a gas boiler

Daikin Emura

Iconic design that senses your needs

Emura is instantly recognisable for its award-winning curved silhouette and intelligent features. Available in matt white, silver, or black, enhance your space with a premium, modern look.

Award-winning style

Intelligent sensing for comfort and efficiency

A 64-grid thermal sensor scans the room to detect whether someone is present. It adjusts airflow to maintain comfort while avoiding draughts when people are there. When the room is empty, the system automatically reduces output to save energy without compromising performance.

Cleaner, fresher air

Equipped with Flash Streamer technology, Emura removes pet hair, pollen, mould and fungus, along with odours, and pollutants from the air. Its ultra-quiet operation, from 19dB(A), and intuitive app, voice, or remote control make it ideal for design-conscious homes that expect more.

Daikin Stylish

Subtle, slim, and advanced

Stylish is the thinnest unit in its class at just 189mm deep, with a minimalist, curved design available in white, black, or silver. It's engineered to complement any interior while delivering powerful, efficient comfort.

Slimmest
in class

Balanced airflow and clean air quality

Stylish directs air smoothly along walls and ceilings, creating gentle, even temperature control while preventing hot or cold draughts and reducing dryness in the eyes and mouth. A thermal sensor fine-tunes the temperature, while advanced filters and Flash Streamer technology clean the air and keep humidity at a comfortable level.

Quiet and intuitive

With whisper-quiet operation and full control through the Onecta app, remote, or voice assistant, Stylish delivers efficient comfort without compromise. For homes that value subtle design and innovation, Stylish is the perfect fit.

Compact,
space-saving
design

Daikin Comfora

Compact, quiet, and allergy-friendly

Comfora is designed for spaces where discretion and clean air matter. Its slim, unobtrusive profile fits above doors or in tight corners, delivering reliable comfort without taking up space. It offers efficient, quiet performance and helps improve air quality in any room.

Peaceful and efficient

With A++ efficiency and whisper-quiet sound levels as low as 19dB(A), Comfora is ideal for bedrooms and offices. Advanced filters remove allergens and odours, while Night Mode can dim or turn off lights whilst adjusting airflow for restful sleep.

Simple, smart control

Controlled via app, remote, or voice, Comfora offers quiet, dependable comfort with minimal footprint. Perfect for compact living.

Daikin Sensira

Dependable comfort made affordable

Sensira delivers reliable Daikin quality at a price that makes efficient heating and cooling accessible to more homes. Designed to provide essential comfort, it's a great choice for single rooms, smaller spaces, or upgrading an older system to something quieter and more efficient.

Affordable
Daikin quality

Reliable and energy-saving

With A++ efficiency and inverter technology, Sensira maintains steady temperatures quietly, from 20dB(A). Built-in filters neutralise allergens and odours, making the air you breathe cleaner.

Simple, smart control

Wi-Fi control is standard, so you can adjust settings, set schedules, and monitor energy use via the Onecta app or voice assistant. For simple, affordable comfort, Sensira delivers.

Daikin Perfera

Powerful, intelligent, and fast

Heat Boost
technology

Perfera is designed for homeowners who want more from their climate system. More power, faster heating, and smarter control. Available as a wall-mounted or floor-standing unit, it combines modern design with advanced performance to deliver premium comfort in any space.

Faster heating and cleaner air

The Heat Boost feature warms rooms up to 14% faster, while motion sensors save energy by reducing output when rooms are empty and redirecting airflow to avoid draughts when occupied. Flash Streamer technology cleans the air by neutralising allergens, odours, and pollutants.

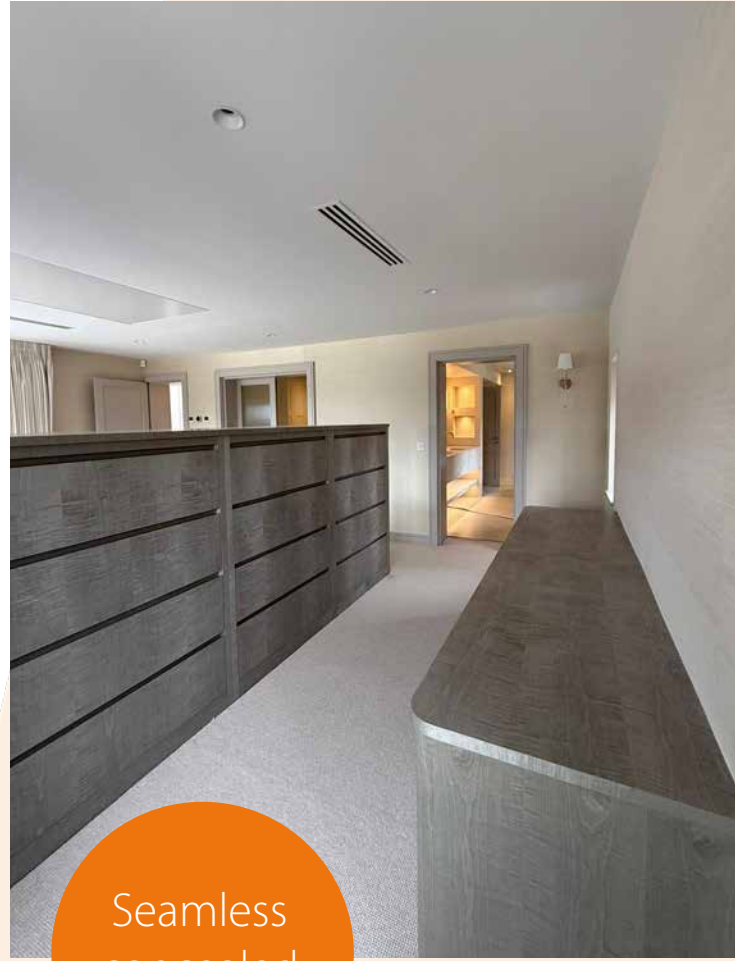

A+++ efficiency

Pair Perfera with selected Daikin multi split outdoor units and enjoy A+++ efficiency in heating and cooling. That means lower bills, a reduced carbon footprint and year-round comfort, delivered with the quiet, gentle airflow that makes Perfera a favourite

Efficient, quiet, and connected

Perfera combines A+++ efficiency, whisper-quiet performance, and easy control through the Onecta app, voice assistants, or a remote. It gives you fast heating, cleaner air, and energy savings. All in one intelligent system.

Seamless
concealed
solutions

Wall-mounted & Concealed Units

Discreet comfort that fits your style

Daikin wall-mounted and concealed units are designed to deliver exceptional comfort without compromising the clean lines of your home. Both options offer discreet, elegant solutions, so you can enjoy powerful, efficient performance while keeping your interior uncluttered.

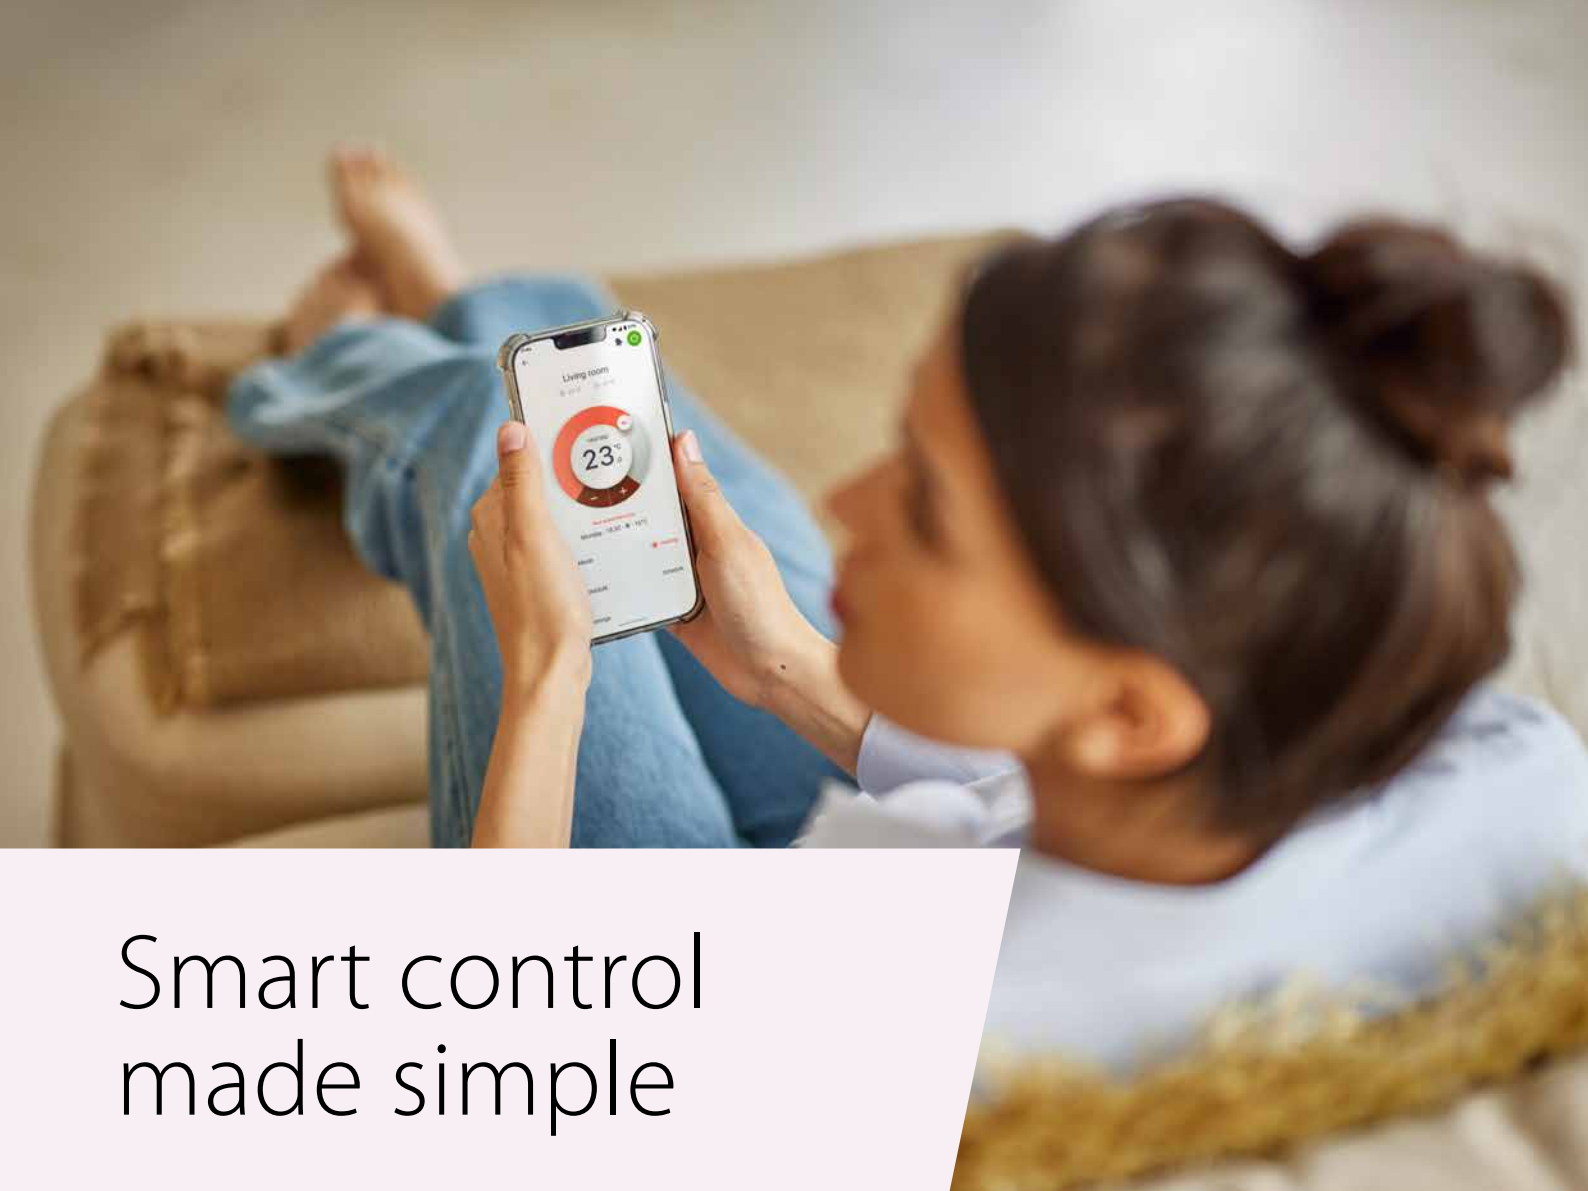

Wall-mounted elegance

Wall-mounted units save valuable floor space and bring a sleek, modern finish to your walls. Available in a variety of finishes, they complement your décor while delivering reliable heating and cooling. Their slim design fits comfortably into almost any room, providing efficient, quiet comfort with minimal visual impact.

Invisible, seamless comfort

Concealed ducted units sit completely out of sight, installed behind ceilings or walls so only subtle vents remain visible. They're ideal for minimalist interiors or spaces where you want your climate system to disappear entirely, leaving nothing but consistent, even airflow throughout the room.

Smart control made simple

Your comfort, your way

With Daikin, you're always in control of your home climate, whether you're sitting on the sofa, busy in another room, or halfway around the world. Our systems are designed to be intuitive and flexible, letting you manage comfort, air quality, and energy use effortlessly.

Onecta app control

The Daikin Onecta app gives you full control of your heating, cooling, and air purification from your smartphone or tablet. Available for both iOS and Android devices, Onecta lets you adjust the temperature, change modes, create schedules, and monitor your energy usage, anytime, anywhere.

Whether you're coming home earlier than planned, going on holiday, or just want to make the room warmer without leaving your chair, Onecta makes it simple.

Simple, smart control

With Onecta, you can create schedules that fit your routine, with different settings for weekdays, weekends, or even each room. Your system only runs when and where it's needed, saving energy while keeping you comfortable. The app also connects to the Daikin heat pump savings calculator, so you can track your energy use and see how much you're saving over time.

Alexa and
Google
compatible

Hands-free or traditional control

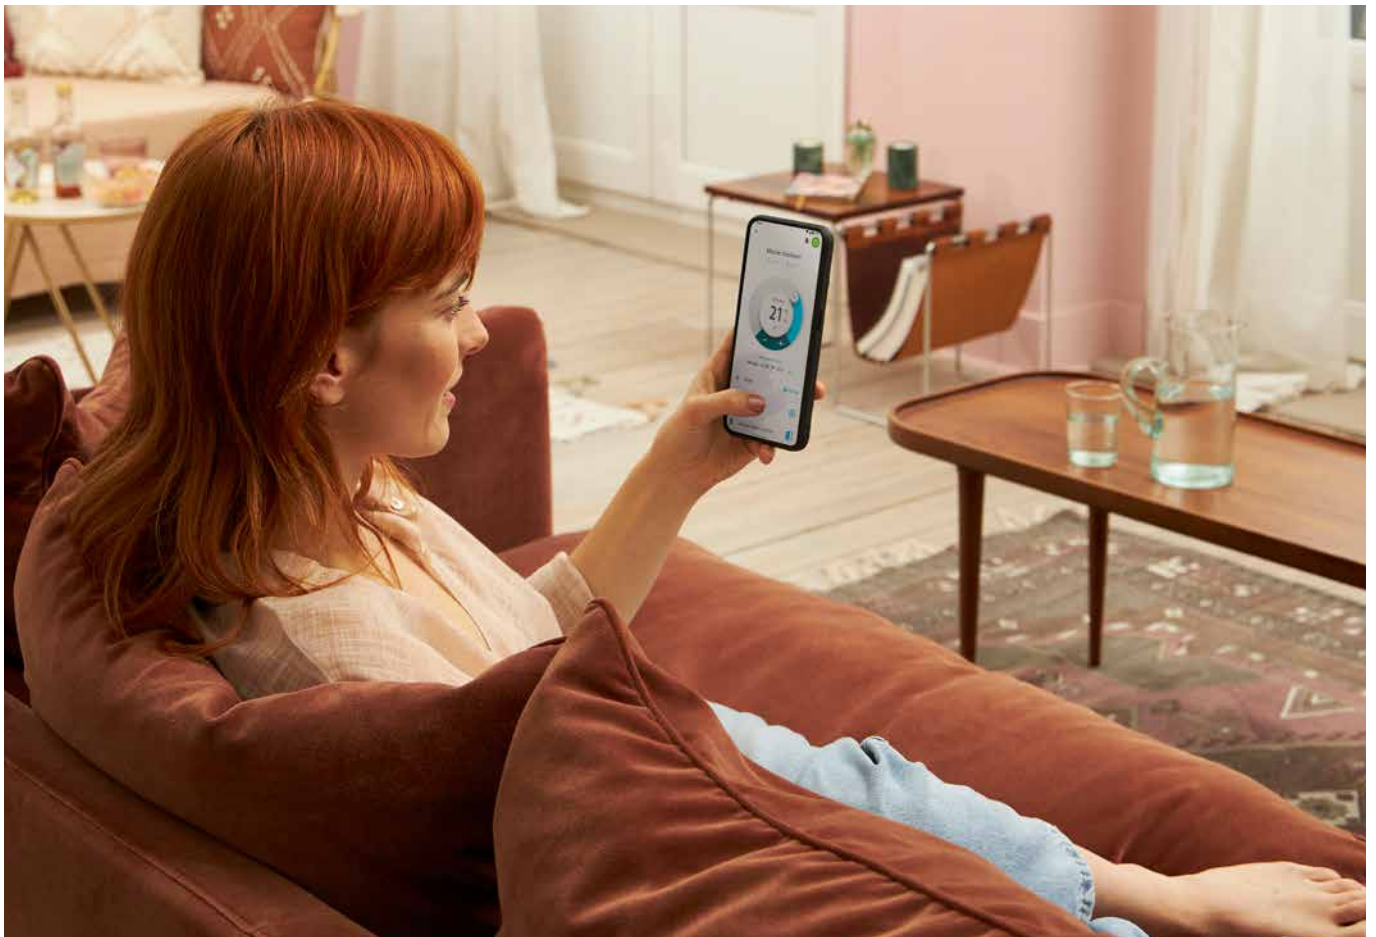

For added convenience, Onecta works with voice assistants like Alexa and Google Assistant. Just say "Turn on the heating in the bedroom" or "Switch to cooling mode," and your system responds instantly. Prefer a traditional approach? Every Daikin unit also comes with an intuitive, easy-to-use remote control.

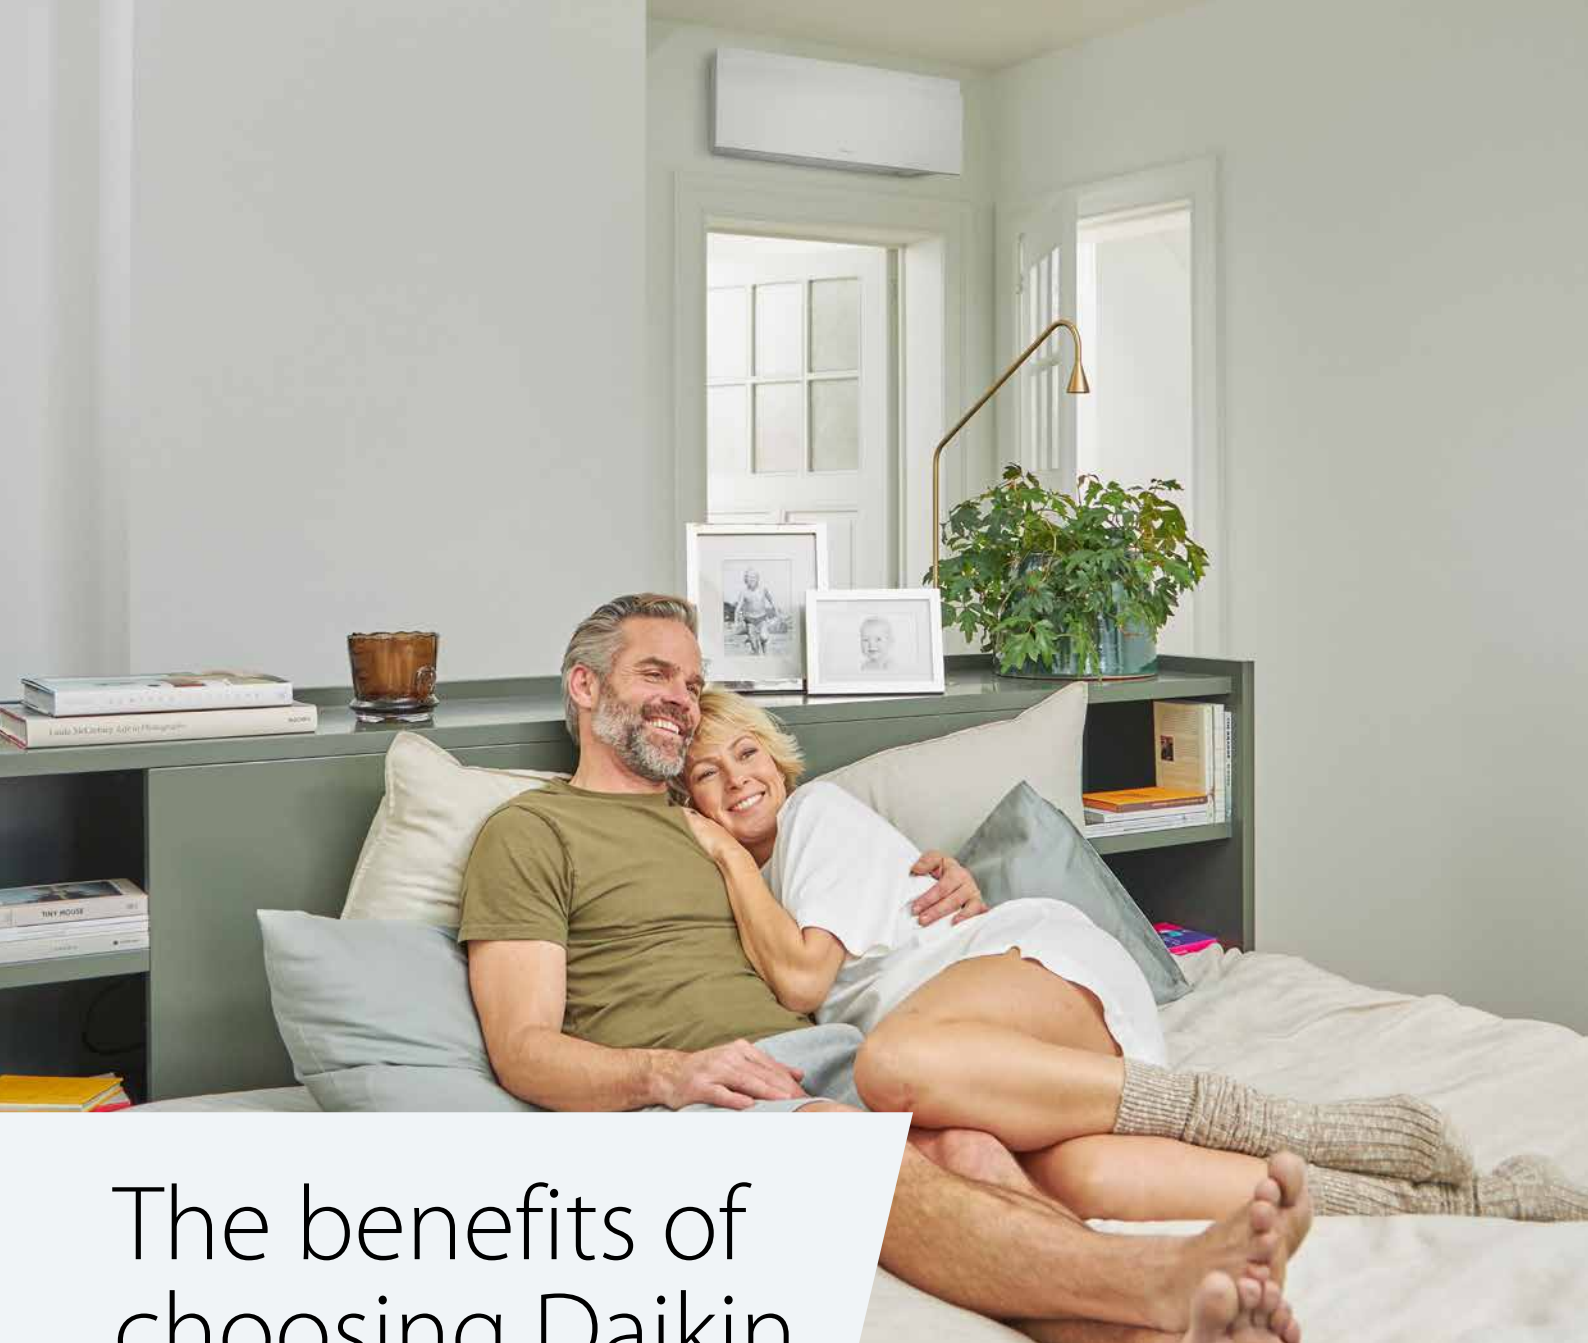

With smartphone, voice, or remote control, Daikin puts comfort at your fingertips.

Top tips for saving energy with Onecta

- › Set lower temperatures at night and when you're out
- › Create different schedules for weekdays and weekends
- › Turn off units in unused rooms at a touch
- › Use the savings calculator to track your progress

The benefits of choosing Daikin

More than just heating and cooling

A Daikin air-to-air heat pump is not just about temperature. It offers a complete package of efficiency, comfort, clean air, and control. And all with quiet, stylish performance.

Energy-efficient by design

Daikin heat pumps take up to 80% of their energy from the air, a free and renewable source, and only about 20% from electricity. Seasonal efficiencies of up to A+++ make them one of the most energy-efficient ways to heat and cool your home, reducing both energy use and your carbon footprint year-round

Cleaner air, healthier home

Indoor air quality is just as important as temperature. Daikin's advanced filters and Flash Streamer technology remove dust, pet hair, mould and fungus, along with odours, and even bacteria, creating a fresher and healthier environment. Whether you're sensitive to allergens or simply want cleaner air, this system helps everyone breathe more easily.

Whisper-quiet operation

Daikin systems are engineered for silence, with indoor sound levels starting at just 19dB(A). Quieter than a whisper, they won't disturb your sleep, work, or relaxation. Even outdoor units operate discreetly, designed to minimise noise and blend in with your surroundings, leaving you with pure comfort, not unwanted sound.

Stylish and flexible options

Our flexible finance options make it easy to invest in premium climate systems. Spread the cost over manageable payments, ease your cash flow, and benefit from fast decisions, quick payments, and upgrade opportunities.

Easy, intuitive control

With Daikin, comfort is always at your fingertips. The Onecta app lets you set schedules, adjust temperatures, and monitor energy use from your phone. Prefer voice commands? Just ask Alexa or Google Assistant. Or use the included remote control for simple, intuitive operation.

Save money. Save energy.

- › Cut your heating costs by up to 50%
- › A+++ efficiency keeps bills low
- › Payback in just 3–5 years

See how much you could save

Switching to a Daikin heat pump can lower your energy consumption and reduce your carbon footprint. But how much could you save in your own home? Use our **heat pump savings calculator** to get a personalised estimate based on your home, your energy use, and your routine..
