The new Round Flow cassette offers stylish good looks and improved comfort

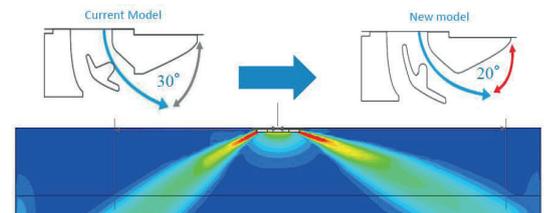

Building on the proven design of the Round Flow cassette, Daikin has applied new technology, raising the bar again in comfort and energy efficiency.

Being the most compact unit available on the market at a height of 204mm, the new Round Flow Cassette offers greater design flexibility to suit the building environment and different structural constraints.

New wider louvres provide better airflow, improving room coverage thanks to the Coanda effect. Individual control and/or closure via wired remote control allows customisation to suit specific room configurations.

Features:

- > New panel only compatible with FCAG-B / FCAHG-H / FXFQ-B
- > A major redesign to deliver even more feature to the end user
- > Wider louvres to improve air circulation

The new decoration panel for use with Sky Air and VRV

Active circulation airflow

A new Active Circulation Airflow logic has been added, activated on startup, this new feature ensures the room reaches the designated set temperature in the fastest, yet most efficient way. The Active Circulation Airflow results in a faster startup and delivers energy savings of 5% in cooling mode and up to 15% in heating mode. Once floor sensor reaches the set temperature, the unit goes back to normal swing operation.

Accessories

Model	Description
BRYQ140B	PIR Sensor for White decoration panel
BRYQ140BB	PIR Sensor for Black decoration panel
BRC7FA532F	Wireless remote control and receiver - White
BRC7FA532FB	Wireless remote control and receiver - Black

Installation advice

As the new decoration panel has a different look compared to the current model, we advise if possible to update your entire project to the new panel. This way, you can guarantee a fully coherent installation.

If unsure, please contact your local A&Q or SOS team to update your quote/order.

Specifications

		BYCQ140E / BYCQ140EB
Dimensions	Height	65
	Width	950
	Depth	950
Weight (kg)		5.5
Compatible with		FCAG-B / FCAHG-H / FXFQ-B
